ELSEVIER

European Journal of Operational Research 83 (1995) 716–718

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Contents Volume 83

1 Optimization methods for electric utility resource planning
B.F. Hobbs

21 An exact algorithm for orthogonal 2-D cutting problems using guillotine cuts
N. Christofides and E. Hadjiconstantinou

39 An exact algorithm for general, orthogonal, two-dimensional knapsack problems
E. Hadjiconstantinou and N. Christofides

57 A method for the cutting stock problem with different qualities
M. Rönnqvist

69 A classification of formulations for the (time-dependent) traveling salesman problem
L. Gouveia and S. Voß

83 A new extension of local search applied to the Dial-A-Ride Problem
P. Healy and R. Moll

105 Estimation and determination of shortest path length in a road network with obstacles
N. Dubois and F. Semet

117 A differential game approach to the dynamic mixed behavior traffic network equilibrium problem
B.-W. Wie

137 Temporal distribution of public transport demand during the peak period
A.S. Alfa and M. Chen

154 Time depending shortest-path problems with applications to railway networks
K. Nachtigall

167 Refueling strategies to maximize the operational range of a nonidentical vehicle fleet
Y. Yuan and A. Mehrez

182 Properties of expected costs and performance measures in stochastic models of scheduled transport
M. Carey and A. Kwieciński

200 The hub location and routing problem
T. Aykin

220 A smooth penalty function algorithm for network-structured problems
S.A. Zenios, M.Ç. Pınar and R.S. Dembo

237 A suboptimal solution to a hierarchial network design problem using dynamic programming
N.G.F. Sancho

245 A comment on "Models, modelling and modellers: an application to risk analysis" by B. Wahlström. European Journal of Operational Research 75 (1994) 477–487
W.W. Cooper

247 Reply to W.W. Cooper. European Journal of Operational Research 83 (1995) 245–246
B. Wahlström

Special Issue: 10th EURO Summer Institute – Combinatorial Optimization

249 Tenth EURO Summer Institute
C. Roucairol, H. Thiriez, J. Krarup, G. Plateau and P. Tolla

253 Some thoughts on combinatorial optimisation
M.H. Bjorndal, A. Caprara, P.I. Cowling, F. Della Croce, H. Lourenço, F. Malucelli, A.J. Orman, D. Pisinger, C. Rego and J.J. Salazar

271 FUN: A dynamic method for scheduling problems
B. Bugnon, K. Stoffel and M. Widmer
283 Heuristics for biquadratic assignment problems and their computational comparison
R.E. Burkard and E. Çela
301 A bound for the Symmetric Travelling Salesman Problem through matroid formulation
P. Cowling and F. Maffioli
310 Generalized pairwise interchanges and machine scheduling
F. Della Croce
320 Scheduling jobs within time windows on identical parallel machines: New model and algorithms
V. Gabrel
330 A comparative study of both standard and adaptive versions of threshold accepting and simulated annealing algorithms in three scheduling problems
C.K.Y. Lin, K.B. Haley and C. Sparks
347 Job-shop scheduling: Computational study of local search and large-step optimization methods
H.R. Lourenço
365 Lower bounds for the quadratic semi-assignment problem
F. Malucelli and D. Pretolani
376 The inverse-parametric knapsack problem
R.E. Burkard and U. Pferschy
394 A minimal algorithm for the Multiple-Choice Knapsack Problem
D. Pisinger
411 Using Tabu search for solving a dynamic multi-terminal truck dispatching problem
C. Rego and C. Roucairol

431 Differential game models of advertising competition
G.M. Erickson
439 Trip frequency scheduling for bus route management in Bangkok
D.L. van Oudheusden and W. Zhu
452 Coal blending optimization under uncertainty
J.-S. Shih and H.C. Frey
466 Modeling investment uncertainty in the costs of global CO_2 emission policy
J.R. Birge and C.H. Rosa
489 Stochastic annealing for synthesis under uncertainty
L. Painton and U. Diwekar
503 Solving stochastic programming problems via Kalman filter and affine scaling
S. Puthenpura, L. Sinha, S.-C. Fang and R. Saigal
514 A new approach to stochastic programming problems: Discrete model
R.R. Joshi
530 Stochastic analysis of combat models under different termination decision rules
N.K. Jaiswal, Y. Sangeeta and S.C. Gaur
547 A cooperative fuzzy game theoretic approach to multiple objective design optimization
A.K. Dhingra and S.S. Rao
568 Fuzzy optimal flow on imprecise structures
S. Chanas, M. Delgado, J.L. Verdegay and M.A. Vila
581 Three models of fuzzy integer linear programming
F. Herrera and J.L. Verdegay
594 Grey integer programming: An application to waste management planning under uncertainty
G.H. Huang, B.W. Baetz and G.G. Patry
621 The bottleneck generalized assignment problem
S. Martello and P. Toth
639 Modelling pairwise comparisons on ratio scales
N. Bryson, A. Mobolurin and O. Ngwenyama
655 A new aggregation–disaggregation algorithm
T. Shioyama and K. Tanaka
670 Coupling the auxiliary problem principle with descent methods of pseudoconvex programming
D. Zhu and P. Marcotte

686 Automatic decrease of the penalty parameter in exact penalty function methods
M. Mongeau and A. Sartenaer
700 Data envelopment analysis: Visualizing the results
S. El-Mahgary and R. Lahdelma
711 A note on exact algorithms for the bottleneck generalized assignment problem
S. Martello and P. Toth
713 Book Reviews, *L.F. Gelders (ed.)*
Stochastic Programming, P. Kall and S.W. Wallace
Quality and Reliability of Technical Systems, A. Birolini
Systems and Decision Making – A Management Science Approach, H.G. Daellenbach
Optimization in Industry: Mathematical Programming and Modeling Techniques in Practice, T.A. Ciriani and R.C. Leachman (eds.)
716 Contents Volume 83
